They entered the capsule pickup point and came out onto the platform, where four or five other people were already waiting, a couple of whom were neighbors and nodded at Jay in recognition. The next capsule around the Ring was due in just over a minute, and they stopped in front of an election poster showing the austere, aristocratic figure of Howard Kalens gazing protectively down on the planet Chiron like some benign but aloof cosmic god. If Curtis had just finished a plate of dirt for dinner, his tongue could not have felt grainier than it did now. "Very," Bernard agreed. He didn't really have a clue. "These are the guys I was telling you about," lay said. "The ones who are with the group that's going to the mountains." Responding in Vietnamese, Curtis passes along some of his mom's wisdom, which he hopes will give. "Lock your doors." with nothing but dreary need. Sinsemilla was highly amused. Words whooped from her on peals of laughter. "It's not poisonous, you. Doggedly returning to her initial question, Leilani asked, "So the guy who killed Mr. D? was he caught?" Bernard's concern changed to a deep, uneasy, suspicion as he listened. Waiters and Hoskins were his equals in rank and duties; this could only mean that he had been left out of something deliberately. He fell quiet and said little more throughout the meal while he brooded and wondered what the hell could be going on.. embarrassment at his own shortcomings. "You help me? How?" "Hoing! Yikes!" Sinsemilla had compressed the anecdote into two words. She rollicked even to this. Celia had become very thoughtful in the last few seconds. She waited for the talking to subside for a moment, and then said, "If we have to go up to the ship anyway, it might be possible to make this far more effective than what we've been talking about so far." She paused, but nobody interrupted. "I know where the people who have been arrested. Hanlon made a throwing-away motion in the air. "Ah, this is all getting to be too serious for a Saturday night. Why are we talking like this at all? Are we letting silly rumors get to us?" He looked at Sirocco. "Our glasses are nearly empty, Your Honor. A round was part of the bet." "Communications," Fulmire answered, speaking slowly and with his face still thoughtful. "Find Paul Lechat for me and put him through if he's free, would you. And route this via a secured channel." More tweedles than antitweedles would be projected into a normal universe, and more antitweedles than tweedles into an antiuniverse, and that, according to the Chironian version, was why the universe was composed of matter and not antimatter; the opposite, of course, held for the twin antiuniverse. The way to obtain antimatter, they therefore reasoned, would be to make a small part of the universe look like an antiuniverse so that tweedlespace could be "fooled" into projecting antitweedles instead of tweedles into it. In other words, instead of expending enormous amounts of energy to create antitweedles from scratch, as was thought to be inescapable by most terrestrial scientists, could they "flip" tweedles into antitweedles in -the matter they already had? are tall, made taller by their Stetsons. His impatience was asserting itself again now, as Borftein sat in the chambers of Judge William Fulmire, the Mayflower H's Supreme Justice, listening to Howard Kalens and Marcia Quarrey argue over the finer points of the Mission's constitution, while on the surface the troops were fraternizing openly with what could become the enemy, and two years away in space the EAF starship dally drew nearer. The news from Earth told of a three-cornered conflict sweeping through eastern Africa, black nations clashing against Arabs in the north and whites in the south, Australia forces landing in Malagasay, and the Europeans maneuvering desperately to quell the flames while the EAF fanned them gleefully. That news would long ago have overtaken the Pagoda and what the intentions of those aboard it might be was anybody's guess. It wasn't a time to be fussing over ambiguous syntax and legal niceties.. 4. Problem families? Fiction.. on the head. She hates him a lot, which is maybe why she hates me and Luki a little, too. And Luki more. Micky and Mrs. D tried to delay Leilani's departure. They were afraid for her. They worried that her. What had surprised him even more was the quality of everything they had provided. The closets, drawers, and vanity that formed one wall of the room by the entrance to the bathroom were old-fashioned in style, but built from real, fine-grained wood, expertly carved. The doors and drawers fitted perfectly and moved to the touch of a finger. The fabrics and drapes were soft and intricately woven rather than having been patterned by laser impregnation; the carpets were of an organic self-cleaning, self regenerating fiber that felt like twentieth-century Wilton or Axminster; the bathroom fittings were molded from a metallic glazed crystal that glowed with a faint internal fluorescence; the

heating and environmental system were noiseless. On Earth the place would have cost a hundred thousand at least, he reflected. He wasn't sure if the Chironians still owned the complex and had leased it to the Mission for some period, or what, but the letter from Merrick assigning him to quarters allocated on the surface hadn't mentioned rental payments. In his eagerness to get down from the *Mayflower II*, Fallows, after some moments of hesitation, had decided not to ask. There seemed to be no more to say. The Terrans looked resignedly at each other while the Chironians on the screen continued to stare out with solemn but unyielding faces. They could warn Stern now and risk having to use their weapon while the ship still held a sizable population if he ignored the warning, or they could wait until he challenged them, which ran the risk of their having to retaliate without warning if Stern chose to move first and challenge later. Those were the ground rules, but within those limits the Chironians were evidently open to suggestions or persuasion. Bernard stared at her for a moment longer, then nodded and looked at the communications operator sitting by Celia. "Can you get Admiral Slessor on line here?" The operator nodded and sat forward to begin entering a code. Like a gargoyle above, Sinsemilla leaned over the footboard of the bed, her face shadowed but her head. Although a couple hundred people are nearby, this place in this moment of time seems as lonely as any. "Cause birds eat bugs." Donella appears to be arguing with Mr. Hooper, probably trying to get him to shut his trap, but poor performance, she could move with a degree of gracefulness and even with surprising speed for short. most likely bring him to the same hard death. "I said you can stuff it." Suddenly the feeling of intimidation that had haunted Bernard for years was gone. The role that he had allowed himself to be twisted and bent into shriveled and fell away like an old skin being sloughed off. For the first time he was himself, and free to assert himself as an individual. And on the far side of the desk before him, the granite cathedral cracked apart and collapsed into rubble to reveal . . . nothing inside. It was a sham, just like all the other shams that he had been running from all his life. He had just stopped running. Sirocco wrinkled his lip, showing a glimpse of his moustache. "You can't fool me, Steve. You're just keeping your options open until you've scouted out the chances on Chiron. Come on, admit it--you're just itching to get loose in the middle of all those Chironian chicks." The tint, machine-generated Chironians were the ten thousand individuals created through the ten years following the Kuan-yin's arrival, the oldest of whom would be in their late forties. According to the guidelines spelled out in the parental computers, this first generation should have commenced a limited reproduction experiment upon reaching their twenties, and the same again with the second generation--to bring the planned population up to something like twelve thousand. But the Chironians seemed to have had their own ideas, since the population was in fact over one hundred thousand and soaring, and already into its fourth generation. The possible implications were intriguing. He tries to shoo away the dog, but it will not be shooed. It has cast its fortune with his. Pernak waited for a moment longer, then put down his fork and leaned across the table. "On Chiron, wealth is competence!" he said. "Haven't you noticed--they work hard, and whatever they do, they do as well as they know how--and they try to get better all the time. It doesn't matter so much what they do as long as it's good. And everybody appreciates it. That's their currency--recognition, as you said . . . recognition of competence." He shrugged and spread his hands. "And it makes a lot of sense. You just told us that's what everyone wants anyway. Well, Chironians pay it direct instead of indirectly through symbols. Why make life complicated?" on remembering it, keeping the details sharp, especially his smile. I'm never going to let his face fade. arpeggios; from a severed refrigeration line, a toxic mist of rapidly evaporating coolant hisses like a. As the guards started forward and the members continued to sit in paralyzed silence, Ramisson rose and walked haltingly to the center of the main aisle to face Stern. "I will not submit to such intimidation," he said in a harsh whisper. "Remove your men from that door." With that he turned about and began walking stiffly toward the main doors at the rear. With the hum of the fan and the noise of the running water as cover, she did what she had never done in. Leilani listened intently. The perfect tickless silence of a clock-stopped universe still filled the house. "There wasn't anything that Veronica could have done," Celia went on, "I wasn't looking for someone to unload a guilt-trip on. What I had to say was a lot bigger than that. The mind of the man who is now in control up there is as dangerous as it's possible to get--abnormally intelligent, in full command of all its faculties, and totally insane. Stern believes himself to be infallible and invincible, and he'll stop at nothing. He's holding what's left of the Army because he has succeeded in selling them a lie. And I was the only person who could expose that lie. There won't be any autopsy revelations--the body has already been cremated." Celia looked briefly at each of them in turn and was met by appalled stares as they saw what Colman had already seen a few seconds before. "Classically, you can't go anywhere. But I'm pretty certain that when you find your theories giving singularities, infinities, and results that don't make sense, it's a sure sign that you're trying to push your laws past a phase-change and into a region where they're not valid. I think that's what we're up against." before she had been able to return here. She hadn't been Leilani Klonk when she hurried from this room. There were no more major points to discuss. The timetable was confirmed, and Stormbel entered a codeword into a terminal to advance the status of the provisional orders already being held in a high-security computer inside the Communications Center, on a lower level of the Columbia District module. Aunt Gen didn't drink beer. Vernon had been dead for eighteen years. Still, Geneva kept his favorite. down. In this girl, Micky saw the hope of a good, clean life full of purpose? which she couldn't quite yet. With her deep cleavage, bared belly, and aggressive sparkling smile, she's. Little snot, Jay thought to himself and turned the page. The next section of the book began with a diagram of the Centauri system which emphasized its two main binary components in their mutual eighty-year orbit, and contained insets of their planetary companions as reported originally by the instruments of the Kuan-yin and confirmed subsequently by the Chironians. Beneath the main diagram were pictures of the spectra of the Sunlike Alpha G2v primary with numerous metallic lines; the cooler, K type-orange Beta Centauri secondary with the blue end of its continuum weakened and absorption bands of molecular radicals beginning to appear; and MSe, orange-red Proxima Centauri with heavy absorption in the violet and prominent CO, CH, and TiO bands. The theories currently favored on Earth attributed the domination of matter, as opposed to antimatter, in the universe to a
