The next capsule around the Ring was due in just over a minute, and they stopped in front of an election poster showing the austere, aristocratic figure of Howard Kalens gazing protectively down on the planet Chiron like some benign but aloof cosmic god. The caption read simply: PEACE AND UNITY. Rickster's slightly slurred voice was further numbed by the cold treat: "You know what's a really good. In the forty-nine years since, Franklin had grown to become a sizable town, in and around which the greater part of the Chironian population was still concentrated. Other settlements had also appeared, most of them along the Medichironian or not far away from it." Skin cancer kills," the girl explained. Praying for nothing more disgusting than puke, Leilani ventured to the bathroom. This cramped. "What does that mean?" Driscoll asked, looking at the Chironian who had spoken. The other members of Red section in the row of seats to the left of him and those of Blue section sitting with Hanlon and Sirocco in the row ahead were strangely silent as they watched the screen where the bright half-disk of Chiron hung in the background: the first real-time view of a planet that some of them had ever seen. Farther back along the cabin, reflecting the planned order of emergence, General Portney was sitting in the center of a group of brass-bedecked senior officers, and behind them Amery Farnhill was tense and dry-lipped among his retinue of civilian diplomatic staff and assistants. In the rear, the SD troops were grim and silent in steel helmets and combat uniforms festooned with grenades, propping their machine rifles and assault cannon between their knees. stocked with strange fish. Pernak waited for a moment longer, then put down his fork and leaned across the table. "On Chiron, wealth is competence!" he said. "Haven't you noticed--they work hard, and whatever they do, they do as well as they know how--and they try to get better all the time. It doesn't matter so much what they do as long as it's good. And everybody appreciates it. That's their currency--recognition, as you said . . . recognition of competence." He shrugged and spread his hands. "And it makes a lot of sense. You just told us that's what everyone wants anyway. Well, Chironians pay it direct instead of indirectly through symbols. Why make life complicated?" In the lock chamber the inner hatch was already open, and the Dispatching Officer from the shuttle's crew was carrying out a final instrumentation check prior to opening the outer hatch. As they waited for him to finish and for the rest of the delegation to move forward in the cabin behind, Colman stared at the hatch ahead of him and thought about the ship lying just on the other side of it that had left Earth before he was born and was now here, waiting for them after crossing the same four light-years of space that had accounted for a full half of his life. After the years of speculations, all the questions about the Chironians were now within minutes of being answered. The descent from the Mayflower II had raised Colman's curiosity to a high pitch because of what he had seen on the screen. For despite all the jokes and the popular wisdom, one thing he was certain of was that the engineering and structural modifications that he had observed on the outside of the Kuan-yin had not been made by irresponsible, overgrown adolescents. afraid that they are beginning to recognize him for the fugitive he is. She understood a way of life in which budget and necessity decided priorities of need, in which clear rules set limits of behavior, and where tried and trusted protocols defined role and function-her own as well as everybody else's; she did not understand, or even want to understand, the swirling ocean of anarchy in which she now found herself, in which individuals were expected to flounder helplessly like paper boats tossed in a tempest, with no charted shores, no havens of anchor, and no guiding stars.
