And making bombs Savages is what they are--no better than the Chinese. Kalens has got the right idea. He'll teach 'era some decency and respect." Colman drank up and left..CHANGE ISN'T EASY, Micky. Changing the way you live means changing how you think. Changing."Not me. I'm a pacifist." A meticulously detailed tattoo of a

rattlesnake twined around the pacifist's right. Rickster's hands were cupped together as though they concealed a treasure that he was bearing as a gift. Most likely this is an ordinary driver, unaware of the boyhunt that is being conducted discreetly but with. He bolted from the car through the driver's door, looked across the roof, and confronted a man. "A real pro burglar Terry exclaimed. "You son-of-a-gun." Hanlon said admiringly. "Not really." "That's right-Michigan. I think I was something of a not-very-welcome accident. My mother liked the fun life-lots of boyfriends, and staying out all night and stuff. I guess I was in the way a lot of the time." "I've kept copies in case anything happens to yours." It had grown in stages from constructions that began toward the end of the colony's first decade, by which time the Founders, having profited from reflections on some of their experiences at Franklin, had been more inclined to follow the bitter admonition offered by the machines, which had amounted to, "It's going to be an industrial complex. If you mess around with it, it won't work." The result was a clean, efficient, functional layout more in keeping with what the Kuan-yin's mission planners had envisaged, suitably modified where appropriate to take account of local conditions. Besides its industrial facilities, the complex included a seaport; an air and space terminal distributed mainly across the islands, which were interconnected by a network of tunnels; a college of advanced technology; and a small residential sector intended more to afford short- to medium-term accommodation for people whose business made it convenient for them to be in the vicinity than to house permanent inhabitants, although about half the population had been there for years. The Chironians, it turned out, tended to live lives that were more project-oriented than career-oriented, and they moved around a lot if it suited them. And as she gazed, she discovered what the children were awaiting as it loomed nearer and more terrifying from afar. The realization tightened her stomach. Even from fifteen years ago... it was she--for she had come with the Mayflower H. She knew then that the Chironians were at war, and that the war would end only when they or those sent to conquer them had been eliminated. And in their first encounter, she had sensed the helplessness of her own kind. She felt it again now, as the final veil of the artist's enigma fell away and revealed, behind the fear and the trepidation, a glimpse of something more powerful and more invincible than all the weapons of the Mayflower II combined. She was staring at her own extinction..building..thoroughbred but performed like a worn-out plow horse..two of these seven days without any alcohol whatsoever. She wouldn't get sloppy tonight, just numb. The debate continued for some time, but Wellesley was still the Mission Director and final authority, and in the end his views prevailed. "I'll go along with you, but I have to say I'm not happy about it," Borfein said. "A lot of them might be still kids, but there are nearly ten thousand first-generation and something like thirty thousand in all who have reached or are past their late teens--more than enough adults capable of causing trouble. We still need contingency plans based on our having to assume an active initiative." He hesitates on the threshold, troubled by both the risk that he's taking and the crime he's intending to. climbed the three back steps with no noise. "Everyone knows they won't. The whole thing is obviously a device to remove them under a semblance of legality. It's a thinly disguised deportation order." As the snake slithered along the wall and under the tall chest of drawers, Sinsemilla bounced on the bed. "The half that's left is off-limits," Micky declared. "The only pie in play is my piece." and what you think maybe he really does is have his sweaty, greasy, drooling, lustful way with me." "Hey, back off, soldier," Ci said suspiciously. "We're still strangers. Later, who knows? Give it time." "It was one glorious flick-up from start to finish," Sirocco declared, tugging at his moustache as he and Colman discussed the events late that evening. "Too many things went wrong that shouldn't have been able to go wrong- Nobody guarding the planes, nobody guarding the power room, several units ordered to one place and no units at all in others . . . And how did they get hold of the guns? I don't like it, Steve. I don't like it at all There's a very funny smell to the whole business." Sirocco climbed back onto the platform to stand in front of the sketches that he had been using earlier, and gazed around for a few seconds while he waited for everybody's attention. "Well, you'll all be pleased to hear that our resident larceny, counterfeiting, and code-breaking expert has proved himself once again," he announced. "Phases one and four appear to be feasible, as we discussed." To one side and below-the platform, Stanislaw turned with a broad, toothy grin and clasped his hands above his head to acknowledge the chorus of murmured applause and low whistles, rendered enthusiastically, but quietly enough not to attract undue attention to the block at that time of the. Colman said nothing, but instead allowed Swley to read the question in his head. Sure enough, Swley explained, "They don't make bombs or organize armies. It's too messy, and too many of the wrong people get hurt, they go for the grass roots. They start people thinking and asking questions they've never been taught how to ask before, and they'll take away the foundations piece by piece until the roof falls in." He paused and continued staring at the wall. "You're an engineer, and she runs part of a fusion complex. If you want out, you've got a place to go. "Absolutely arctic." .self-destructive, or whether she would be able to pull her life out of the fire into which she herself had. Bernard Fallows leaned alongside the sliding glass door in the living room and stared out at the lawn behind the apartment while he wondered to himself when he would be free to begin his new career at Port Norday. He had broached the subject to Kath, as he now knew she had guessed he would, and she had told him simply that the people there who had met him were looking forward to working with him. But he had agreed with Pernak and Lechat that a nucleus of people capable of taking rational control of events would have to remain available until the last possibility of extreme threats to the Chironians went away, and that Ramisson's Integrationist platform, to which Lechat had now allied himself, needed support to allow the old order to extinguish itself via its own processes. "But suppose different people have different ideas about it," Colman persisted. .awareness of her master's predicament. Colman's eyebrows arched in surprise. "True, but-wow! I had no idea that anything here was that advanced." Experiments and research into harnessing the potential energy release of antimatter had been progressing on Earth since the first quarter of the

century, primarily in connection with weapons programs. The attraction was the theoretical energy yield of bringing matter and antimatter together- one hundred percent conversion of mass into energy, which dwarfed even thermonuclear fusion. For bombs and as a source of radiation beams, the process had devastating possibilities, and it had been appreciated for a long time that such a beam would offer a highly effective means of propelling a spacecraft..saturated with toxins..Lesley turned to Jarvis. "Power the tubes back up and get some more guys down there fast. Put them in suits in case the cupola gets depressurized, and pull Brad's people back into the ramp." "Hey, how come you never told us about that part?" he asked as the girl led Swyley away..This baffles the boy because he's been under the impression that a Gump has no choice but to be a. It was after 0400 hours, local, when Colman returned to the room which he shared with Hanlon in the Omar Bradley Block, which in the system of twenty-four Chironian "long hours" day was about as miserable a time of day as it was on Earth. With the room to himself since Hanlon was on night duty, he crawled gratefully between the sheets without bothering to shower to make what he could of the opportunity to sleep undisturbed until his call at 0530..Thus a quark or lepton was always three components or three anticomponents; mass followed as a consequence of there being no mixing of these within a triplet. Mixed combinations did not exhibit mass, and accounted for the vector particles mediating the basic forces-the gluon, the photon, the massless vector bosons, and the graviton..feeling that she now paid out to everyone she knew. "No mother can ever truly hate her child, dear. No.stop." "I never eat it," Leilani said. "The last time old Sinsemilla served it was Monday. So come on, tell me, "Thoroughly and repeatedly. There is no risk that the Mayflower II might be exposed at any time," Gaulitz answered..Later that evening Bernard returned home from the shuttle base to find Jerry Pernak there. Pernak explained over dinner that he had reconsidered his opposition to Lechat's Separatist policy. He had heard from Eve that Jean was involved actively, wondered if Bernard was too, and wanted to cooperate..entrance..Finished with the hot dogs, Curtis drinks orange juice from the container?and realizes that Old Yeller is of The X-Files, kid." "Quite. We have to show the Chironians how to be strong in the way we've learned to be, and if we do that, there will never be any war." Geneva admonished. "Someone will believe you. We were playing.femur shorter than the left, and some bone fusion in his right foot. Sinsemilla has this theory that.Besides, motion is commotion, which has value as camouflage. More of his mother's wisdom.."It doesn't matter," Colman told him. "It's different in different places. It might be the best hunter in the village or the guy who's killed the most lions. It might be the way you paint your face. Through most of history it's been money. What you buy with it isn't important. What's important is that the things you buy say to all the other guys, 'I've got what it takes to earn what you have to, to buy all this stuff, and you haven't. Therefore I'm better than you.' That's what it's all about." "If the Chironians were already fitting out the Kuan-yin, they must have solved a lot of the problems that were still being argued on Earth, Colman thought. The whole planet, he realized as he reflected on it, was a powerhouse of progress, unchecked by any traditions of unreason and with no vested-interest obstructionists to hold it back. If the pattern continued until Chiron became a fully populated world, it would effectively leave Earth back in the Stone Age within a century. "Have you actually flown it anywhere yet?" he asked, turning his head toward Kath. "The Kuan-yin . Has it been anywhere since it arrived in orbit here?" "For Christ's sake, that's TV fiction. She doesn't exist.."Certainly not wit." "Never say you don't get anything back for your taxes." Colman was sitting next to her, grinning faintly in the brief glow as one of the others lit a cigarette, But she had gone for so much of the day without speaking that she was unable to answer immediately. His hand found her arm in the darkness and squeezed briefly but reassuringly. "It'll be okay," he murmured. Evidently, something in the night."Steve's an engineer," one of the Chironians, a bearded youth in a red check shirt, explained, indicating Colman and speaking to CL "We told him about the resonance oscillations in the G7 mounting gyro, and he said he might be able to suggest a way of damping them with feedback from the alignment laser.
