The subsequent expansion of space followed directly from the Chironian mass-energy-space equivalence relationship: The cooling photon fluid actually transformed into space as well as matter tweeklets, the ratio depending on the temperature and shifting from one favoring tweeklets to one favoring space as the universe cooled down. Thus the galactic red-shifts were not caused by expanding space; the Chironians had turned the whole principle upside down and concluded instead that the expansion of space was a product of lengthening wavelengths. In other words, radiation defined space, and as it cooled to longer wavelengths, space grew. Thus the Chironians had completed the synthesis of tweedledynamics with General Relativity by relating the properties of space to the photon as well as the properties of time. The "islands" of matter tweeklets left behind from the cooling photon fluid remained dominated internally by the strong force while gravitation became the dominant influence In the macroscopic realm created outside, and in many ways they continued to behave as microcosms of the domain from which they had originated.. gazing out across the enormous kitchen, wide-eyed, watching the hunters.
