This wasn't really vodka for Micky. This was anger for."Hey, kid, how do you like---"."I was only trying to?". "When I was a little kid, I saw a fantastic performing-dog act. This golden retriever did all these. The next part was going to be the trickiest. The information obtained by Stanislaw had confirmed that the outside entrances to the complex, which had already been bypassed, were

the most strongly guarded, and the three inner access points to the Communications Center itself- the main foyer at the front, the rear lobby, and a side entrance used by the staff-were covered by less formidable, three-man security teams. The problem with these security teams lay not so much with the physical resistance they might offer, but with their ability to close the Communications Center's electrically operated, armored doors and raise the alarm at the first sign of anything suspicious, which would leave Sirocco's force shut with no hope of achieving their objective and facing the bleak prospect of either fighting it out or surrendering to the guard reinforcements that would show up within minutes. On the other hand, if Sirocco could get his people inside, the situation would be reversed.. "So it could take a while," Colman said..that had stuck to her skin..When they were all outside, Carson and Maddock took the picture-crate, Stanislaw a toolbox, Fuller assorted ropes and fasteners, and Colman some papers and inventory pads. Veronica carried a large roll of packing foam on her shoulder, keeping it pressed against the side of her face. Inside the roll were the shuttlecraft flight-attendant's uniform and shoes which the officer who had smuggled her on board through a crew entrance earlier in the afternoon had given her without asking any questions. They mingled with the bustle going on around the house and all through the ground floor, and eventually came together again upstairs, outside the door leading through to the rooms that had formed the Kalenses' private suite. Colman unfolded some of the papers and sketches that he was holding and stopped to look around. After a few seconds he gestured to attract the attention of the SD guard who was standing disinterestedly near the top of the main stairs, and nodded his head in the direction of the door. "Is that the way into the bedroom and private quarters?" he asked.. "I mean the bag. It's an airsickness bag." His grin faded. "What? you never saw one before?" "On your way?" lean asked Pernak..please don't forget the large bills under the drawer.' ".Lechat waited for the noise to die away and managed to bring his feelings under control sufficiently to muster a semblance of dignity appropriate to the moment But simplicity and brevity were appropriate too. "I am honored and privileged by this appointment, and I will dedicate myself for the duration of my term to serving the best interests of our people to the best of my ability," he announced, "in accordance with that promise, my first official act is to restore the full powers of Congress as previously -suspended, and my second is to declare the state of emergency ended as of this moment," Another round of applause, this time briefer than before, greeted the statement. "Next, I have two proposals to put to the vote of the assembly," Lechat said. "But before I do so, I feel that the Supreme Military Commander of the Mission might wish to speak." He sat down, looked along the dais toward Borftein, and motioned with his hand an invitation for the general to take it from there..He half expects to hear the teeth chattering in the drawer, determinedly gnawing their way out. He has."I don't know. We haven't tried it yet," Bernard answered. He raised his voice a fraction. "Anybody home? What do we have to do to get a computer in this place?" No response..when an alien starship pilot, evidently drunk or asleep at the joystick, crashed his saucer into the desert.. "So far, you're not registering high on my terror meter." "Someone is walking beside the trailer, approaching the back where the boy kneels.. "He's saying money's nothing but vomit to him." Quarrey sighed and shook her head. "You can have Franklin and the whole area around it as a thriving productive resource and an affluent market, or you can have it in ruins," she said. "Given the choice, which would you prefer? Well, it's not as if we didn't have the choice, is it? We have..got my orders." "So have I." "That's different." "How?" "Down!" Maddock yelled, and all three hurtled themselves sideways to get out of the line of fire as a smoke grenade launched from around a corner some distance behind them exploded at the entrance. Fire from the entranceway raked the area as the D Company squad broke cover and rushed forward through the smoke, hut the first of them was still twenty feet away when the steel door slammed down and alarms began sounding throughout the Government Center. -.sixty-year-old woman. "Micky, sweetie, did you have a good day?" Wellesley raised a hand a fraction. "Be careful you don't allow this to get too personal, Howard," he cautioned. "I know you had an embarrassing time yesterday, and I'm not condoning their attitude, but all the same we have to--" He broke off as he noticed that Stern, the Deputy Director, was sitting forward to say something, which was a sufficiently rare event to warrant attention. Bernard frowned suddenly. "Yes, it is. And I didn't know about it." His concern intensified as the implications sank in. "Who are they?".Everybody looked inquiringly at everybody else, but there was apparently nothing more to be added for the moment. At last Colman rose to his feet. "Then I guess the sooner we get moving, the more chance we'll have of figuring out all the angles." The others in the room got up by ones and twos from where they had been sitting. Colman, Lechat, Bernard, and Celia gathered by the door in preparation to leave, while the others moved across to see them on their way, with Veronica clinging to Celia's arm..next year covered." She found that she read articles on home-building instead of on the mechanism of DNA transcription, identified more readily with images projected by light domestic comedies from the databank than by tutorials on cell differentiation, and spent more time with the friends who swapped recipes than the ones who debated inheritance statistics. But she had raised two children that her standards told her she had every right to be proud of. She was entitled to rewards for the sacrifices she had made. And now Chiron was threatening to steal the rewards

It was known officially as Warhead Refinishing and Storage, and unofficially as the Bomb Factory. Nobody worked there. Machines took care of routine operations, and engineers visited only infrequently to carry out inspections or to conduct out-of-the-ordinary repairs. Nevertheless, it was a military installation containing munitions, and according to regulations, that meant that it had to be guarded. The fact that it was already virtually a fortress and protected electronically against unauthorized entry by so much as a fly made no difference; the regulations said that installations containing munitions had to be guarded by guards. Hence the question probably concerned him more than anybody else. Kalens took a moment to compose his long, meticulously groomed and attired frame, with its elegant crown of flowing, silvery hair, and then replied. "I agree with John that a rigid rule needs to be asserted early on . . . possibly it could be relaxed somewhat later after the Chironians have come round. However, Mark has a point too.
